

Table of Contents

Chapter 1	Introduction, Record Keeping, and Laboratory Safety	1
1.1	Introduction	1
1.2	Preparing for the Laboratory	2
1.3	Working in the Laboratory	2
1.4	The Laboratory Notebook	4
1.5	General Protocol for the Laboratory Notebook	4
1.6	Types of Organic Experiments and Notebook Formats	5
1.7	Sample Calculations for Notebook Records	13
1.8	Safe Laboratory Practice: Overview	15
1.9	Safety: General Discussion	16
1.10	Safety: Material Safety Data Sheets	19
1.11	Safety: Disposal of Chemicals	23
	<i>Historical Highlights: The Importance of Record Keeping</i>	24

Chapter 2	Techniques and Apparatus	26
2.1	Glassware: Precautions and Cleaning	26
2.2	Standard-Taper Glassware for Miniscale Procedures	27
2.3	Standard-Taper Glassware for Microscale Procedures	29
2.4	Assembling Apparatus	30
2.5	Measuring and Transferring Liquids	31
2.6	Weighing Methods	35
2.7	Melting Point Methods and Apparatus	36
2.8	Boiling Point Methods and Apparatus	39
2.9	Heating Methods	41
2.10	Cooling Techniques	47
2.11	Stirring Methods	48
2.12	Centrifugation	50
2.13	Simple Distillation	51
2.14	Fractional Distillation	54
2.15	Vacuum Distillation	56
2.16	Steam Distillation	60
2.17	Filtration Apparatus and Techniques	62
2.18	Decolorizing Carbon	67

- 2.19 Decanting Solutions 68
- 2.20 Sublimation 69
- 2.21 Extraction 70
- 2.22 Heating Under Reflux 76
- 2.23 Gas Traps 78
- 2.24 Drying Agents 80
- 2.25 Drying Organic Solutions 81
- 2.26 Drying Solids 82
- 2.27 Drying Tubes 83
- 2.28 Drying Apparatus 83
- 2.29 Evaporating Solvents 84

Chapter 3 **Solids: Recrystallization and Melting Points 88**

- 3.1 Introduction 88
- 3.2 Recrystallization 89
 - Recrystallization 96**
 - A. Solvent Selection 96
 - B. Recrystallizing Impure Solids 98
 - Miniscale Procedures 98
 - Microscale Procedures 100
- 3.3 Physical Constants: Melting Points 107
 - Melting Points 111**
 - A. Calibration of Thermometer 111
 - B. Determining Capillary-Tube Melting Points 112
 - Optional Discovery Experiment 113
 - Melting Point Depression 113

Chapter 4 **Liquids: Distillation and Boiling Points 116**

- 4.1 Introduction 116
- 4.2 Boiling Points of Pure Liquids 116
 - Boiling Points of Pure Liquids 118**
 - Miniscale Procedure 118
 - Microscale Procedure 118
- 4.3 Simple Distillation 120
 - Simple Distillation 122**
 - Miniscale Procedure 122
 - Optional Procedure 123
 - Microscale Procedure 123
- 4.4 Fractional Distillation 124
 - Fractional Distillation of a Binary Mixture 129**
 - Miniscale Procedure 130
 - Optional Discovery Experiments 131
 - Comparative Fractional Distillations 131
 - Fractionation of Alternative Binary Mixtures 131
- 4.5 Steam Distillation 134

- 4.6 Steam Distillation: Isolation of Citral from Lemon
Grass Oil 136

Steam Distillation of Citral from Lemon Grass Oil 137

Miniscale Procedure 137

Historical Highlights: Reducing Automobile Emissions 139

Chapter 5 Extraction 141

- 5.1 Introduction 141

- 5.2 Theory of Extraction 142

- 5.3 Base and Acid Extractions 144

Base and Acid Extractions 149

Miniscale Procedures 149

Microscale Procedures 152

Optional Discovery Experiments 154

Separation of Unknown Mixture by Extraction 154

Isolation of Ibuprofen 155

- 5.4 Extraction of a Natural Product: Trimyristin 158

Isolation of Trimyristin from Nutmeg 159

Miniscale Procedure 160

Microscale Procedure 160

Historical Highlights: Natural Products 162

Chapter 6 Chromatography 166

- 6.1 Introduction 166

- 6.2 Thin-Layer Chromatography 167

Separation of Spinach Pigments by TLC 171

Procedure 171

Optional Discovery Experiments 172

Effect of Solvent Polarity on Efficiency of Separation 172

Analysis of Plant Pigments from Various Sources 172

Separation of *Syn*- and *Anti*-Azobenzenes by TLC 173

Procedure 173

Optional Discovery Experiment 174

Analysis of Analgesics by TLC 174

- 6.3 Column Chromatography 175

Column Chromatography 179

Procedure 179

Optional Discovery Experiment 180

Column Chromatographic Separation of Benzyl Alcohol
and Methyl Benzoate 180

- 6.4 Gas-Liquid Chromatography 182

A. Qualitative and Quantitative Analyses of a Mixture of
Compounds by GLC 191

Procedure 192

Optional Discovery Experiments 192

Analysis of Factors Affecting Retention Times 192

Effect of Stationary Phase on Separation of a Mixture 192

B. Determining GLC Response Factors 193

Procedure 193

Optional Discovery Experiments 193

Molar Response Factors of Isomers 193

Molar Response Factors of Non-isomeric Compounds 193

Historical Highlights: Who's Taking What? Analysis of Biological Fluids for Illegal Substances 195

Chapter 7 **Stereoisomers 198**

7.1 Introduction 198

7.2 Separation of Diastereomeric 1,2-Cyclohexanediols 201

Separation of Diastereomeric 1,2-Cyclohexanediols 202

Procedure 202

7.3 Isomerization of Dimethyl Maleate to Dimethyl

Fumarate 204

Isomerization of Dimethyl Maleate to Dimethyl Fumarate 205

Miniscale Procedure 205

Microscale Procedure 206

7.4 Properties of the Enantiomers of Carvone 207

Properties of the Enantiomeric Carvones 209

Procedure 210

7.5 Polarimetry 212

7.6 Resolution of Racemic 1-Phenylethanamine 213

Resolution of Racemic 1-Phenylethanamine 214

Miniscale Procedure 215

Historical Highlights: Discovery of Stereoisomers 217

Chapter 8 **Spectral Methods 221**

8.1 Introduction 221

8.2 Infrared (IR) Spectroscopy 224

8.3 Nuclear Magnetic Resonance (NMR) Spectroscopy 242

8.4 Ultraviolet and Visible Spectroscopy 276

8.5 Mass Spectrometry 284

Historical Highlights: Medical Diagnostics via Nuclear Magnetic Resonance Spectroscopy 287

Chapter 9 **Alkanes 290**

9.1 Introduction 290

9.2 Chlorination Using Sulfuryl Chloride 291

Free-Radical Chain Chlorination of 1-Chlorobutane 293

Miniscale Procedure 294

Microscale Procedure 295

	Optional Discovery Experiment	296
	Chlorination of Heptane	296
9.3	Bromination: Selectivity of Hydrogen Atom Abstraction	300
	Relative Rates of Free-Radical Chain Bromination	302
	Procedure	303

Chapter 10 Alkenes 310

10.1	Introduction	310
10.2	Dehydrohalogenation of Alkyl Halides	311
	Base-Promoted Elimination of an Alkyl Halide	313
	A. Elimination with Alcoholic Potassium Hydroxide	314
	Miniscale Procedure	314
	Microscale Procedure	315
	B. Elimination with Potassium <i>tert</i> -Butoxide	316
	Miniscale Procedure	316
	Optional Discovery Experiment	316
	Elimination of Alternate Non-terminal Alkyl Halides	316
10.3	Dehydration of Alcohols	321
	Dehydration of Alcohols	324
	A. Dehydration of 4-Methyl-2-pentanol	325
	Miniscale Procedure	325
	B. Dehydration of Cyclohexanol	326
	Miniscale Procedure	326
	Microscale Procedure	326
	Optional Discovery Experiment	327
	Elimination of Stereoisomeric Alcohols	327
10.4	Addition Reactions of Alkenes: Overview	336
10.5	Addition of Hydrobromic Acid to Alkenes	339
	Addition of Hydrogen Bromide to 1-Hexene	341
	Miniscale Procedure	341
	Microscale Procedure	342
10.6	Bromination of Alkenes	348
	Bromination of (<i>E</i>)-Stilbene	349
	Miniscale Procedure	349
	Microscale Procedure	350
10.7	Acid-Catalyzed Hydration of Alkenes	353
	Hydration of Norbornene	354
	Miniscale Procedure	355
10.8	Hydroboration–Oxidation of Alkenes	359
	Hydroboration–Oxidation of (+)-α-Pinene	362
	Miniscale Procedure	363
	Microscale Procedure	364
	Historical Highlights: Additions Across Carbon–Carbon π-Bonds	368

Chapter 11 Alkynes 371

- 11.1 Introduction 371
- 11.2 Dehydrohalogenation of 1,2-Dihaloalkanes 372
 - Dehydrobromination of *Meso*-Stilbene Dibromide 373**
 - Miniscale Procedure 373
 - Microscale Procedure 374
- 11.3 Addition Reactions of Alkynes 377
 - Preparation of 3-Methyl-3-hydroxy-2-butanone 379**
 - Miniscale Procedure 379
- 11.4 Terminal Alkynes as Acids 383
 - Formation of a Silver Acetylide and Its Decomposition 384**

Chapter 12 Dienes: The Diels-Alder Reaction 386

- 12.1 Introduction 386
- 12.2 Mechanistic and Stereochemical Aspects 387
- 12.3 Applications of Diels-Alder Reactions 389
 - Diels-Alder Reaction 391**
 - A. Reaction of 1,3-Butadiene and Maleic Anhydride 391
 - Miniscale Procedure 391
 - Microscale Procedure 391
 - B. Reaction of 1,3-Cyclopentadiene and Maleic Anhydride 392
 - Miniscale Procedure 392
 - Microscale Procedure 393
 - C. Hydrolysis of Anhydrides 394
 - 4-Cyclohexene-*cis*-1,2-dicarboxylic Acid 394
 - Miniscale Procedure 394
 - Microscale Procedure 395
 - Bicyclo[2.2.1]hept-5-en-*endo*-2,3-dicarboxylic Acid 395
 - Miniscale Procedure 395
 - Microscale Procedure 396

Historical Highlights: Discovery of the Diels-Alder Reaction 406

Chapter 13 Kinetic and Thermodynamic Control of a Reaction 409

- 13.1 Introduction 409
- 13.2 Formation of Semicarbazones under Kinetic and Thermodynamic Control 411
 - Kinetic and Thermodynamic Control of a Reaction 414**
 - A. Preparation of Cyclohexanone Semicarbazone 414
 - B. Preparation of a 2-Furaldehyde Semicarbazone 415
 - C. Reactions of Semicarbazide with Cyclohexanone and 2-Furaldehyde in Phosphate Buffer Solution 415
 - D. Reactions of Semicarbazide with Cyclohexanone and 2-Furaldehyde in Bicarbonate Buffer Solution 415
 - E. Tests of Reversibility of Semicarbazone Formation 416

Chapter 14 Nucleophilic Aliphatic Substitution: Preparation of Alkyl Halides 423

- 14.1 General Concepts 423
- 14.2 Classification of Nucleophilic Substitution Reactions 424
- 14.3 Competition Between Substitution and Elimination 426
- 14.4 Preparation of 1-Bromobutane: An S_N2 Reaction 427
 - Preparation of 1-Bromobutane 429**
 - Miniscale Procedure 429
 - Microscale Procedure 430
 - Optional Discovery Experiment 431
 - Analysis of S_N Reactions as a Function of Substrate 431
- 14.5 Preparation of 2-Chloro-2-methylbutane: An S_N1 Reaction 435
 - Preparation of 2-Chloro-2-methylbutane 437**
 - Miniscale Procedure 437
 - Microscale Procedure 438
 - Optional Discovery Experiment 438
 - Analysis of S_N Reactions as a Function of Substrate 438
- 14.6 Chemical Kinetics: Evidence for Nucleophilic Substitution Mechanisms 442
 - Kinetics of Solvolysis of 2-Chloro-2-methylbutane 446**
 - Miniscale Procedure 446
 - Optional Discovery Experiments 448
 - Effect of Temperature on Rates of Solvolysis 448
 - Effect of Leaving Group on Rates of Solvolysis 449

Chapter 15 Electrophilic Aromatic Substitution 452

- 15.1 Introduction 452
- 15.2 Friedel-Crafts Alkylation of *p*-Xylene with 1-Bromopropane 453
 - Friedel-Crafts Alkylation of *p*-Xylene 456**
 - Miniscale Procedure 456
 - Microscale Procedure 458
- 15.3 Friedel-Crafts Acylation of *m*-Xylene 465
 - Friedel-Crafts Acylation of *m*-Xylene with Phthalic Anhydride 467**
 - Miniscale Procedure 467
 - Microscale Procedure 468
- 15.4 Nitration of Bromobenzene 473
 - Nitration of Bromobenzene 476**
 - A. Nitration 476
 - Miniscale Procedure 476
 - Microscale Procedure 477
 - B. Thin-Layer Chromatography 478

- C. Column Chromatography 478
 - Miniscale Procedure 478
- 15.5 Relative Rates of Electrophilic Aromatic Substitution 483
 - Relative Rates of Electrophilic Aromatic Bromination 485**
 - A. Qualitative Measurements 486
 - Miniscale Procedure 486
 - B. Quantitative Measurements 486
 - Miniscale Procedure 486

Historical Highlights: Discovery of the Friedel-Crafts Reaction 494

Chapter 16 Oxidation of Alcohols and Carbonyl Compounds 497

- 16.1 Introduction 497
- 16.2 Preparation of Aldehydes and Ketones by Oxidation of Alcohols 599
 - Oxidation of Alcohols 503**
 - A. Oxidation of Cyclododecanol to Cyclododecanone 503
 - Miniscale Procedure 503
 - B. Oxidation of 4-Chlorobenzyl Alcohol to 4-Chlorobenzoic Acid 507
 - Miniscale Procedure 507
 - Microscale Procedure 508
- 16.3 Base-Catalyzed Oxidation-Reduction of Aldehydes: The Cannizzaro Reaction 513
 - Base-Catalyzed Oxidation-Reduction of Aldehydes by the Cannizzaro Reaction 514**
 - Miniscale Procedure 514
 - Microscale Procedure 515

Historical Highlights: Green Chemistry 519

Chapter 17 Reduction Reaction of Double Bonds: Alkenes, Carbonyl Compounds, and Imines 521

- 17.1 Introduction 521
- 17.2 Catalytic Hydrogenation of the Carbon-Carbon Double Bond 523
 - Hydrogenation of 4-Cyclohexene-*cis*-1,2-Dicarboxylic Acid 524**
 - Miniscale Procedure 525
- 17.3 Reduction of Imines; Preparation of Amines 529
 - Formation and Reduction of *N*-Cinnamylidene-*m*-nitroaniline 531**
 - Miniscale Procedure 531
 - Microscale Procedure 532
- 17.4 Reduction of Carbonyl Compounds: Preparation of Alcohols 538
 - Reduction of 9-Fluorenone 539**
 - Miniscale Procedure 539

- Microscale Procedure 540
- Optional Discovery Experiment 541
- Reduction of 4-*tert*-Butylcyclohexanone 541
- 17.5 Enzymatic Reduction: A Chiral Alcohol from a Ketone 544
 - Enzymatic Reduction of Methyl Acetoacetate 545**
 - Miniscale Procedure 545
- 17.6 Determining Optical Purity 550
 - Determining Optical Purity of Methyl (*S*)-(+)-3-Hydroxybutanoate 551**
 - Procedure 551

Chapter 18 Reactions of Carbonyl Compounds 554

- 18.1 Introduction 554
- 18.2 The Wittig and Related Reactions 556
 - Wittig and Wadsworth-Emmons Reactions 559**
 - A. Synthesis of (*Z*)- and (*E*)-Stilbenes by a Wittig Reaction 559
 - Miniscale Procedure 559
 - Microscale Procedure 560
 - Optional Discovery Experiment 561
 - Wittig Reaction of 9-Anthraldehyde 561
 - B. Synthesis of a Stilbene by the Wadsworth-Emmons Reaction 562
 - Miniscale Procedure 562
 - Microscale Procedure 563
- 18.3 Reactions of Stabilized Carbanions from Carbonyl Compounds 569
 - Synthesis of *trans*-*p*-Anisalacetophenone 572**
 - Miniscale Procedure 572
 - Microscale Procedure 572
- 18.4 Conjugate Addition to an α , β -Unsaturated Ketone 577
 - Preparation of 4,4-Dimethyl-2-cyclohexen-1-one 580**
 - Miniscale Procedure 580
 - Microscale Procedure 581

Historical Highlights: The Wittig Reaction 588

Chapter 19 Organometallic Chemistry 590

- 19.1 Introduction 590
- 19.2 Grignard Reagents: Preparation 591
 - Preparation of Grignard Reagents 594**
 - Miniscale Procedure 595
 - Microscale Procedure 596
- 19.3 Grignard Reagents: Reactions 600

19.4 Special Experimental Techniques 602

Reactions of Grignard Reagents 603

A. Preparation of Triphenylmethanol 603

Miniscale Procedure 603

Microscale Procedure 604

B. Preparation of Benzoic Acid 606

Miniscale Procedure 606

Microscale Procedure 607

C. Preparation of 2-Methyl-3-heptanol 609

Miniscale Procedure 609

*Historical Highlights: Grignard and the Beginnings of Modern Organometallic Chemistry 617***Chapter 20 Carboxylic Acids and Their Derivatives 618**

20.1 Introduction 618

20.2 Esters and the Fischer Esterification 620

Preparation of Benzocaine 622

Miniscale Procedure 622

Microscale Procedure 623

20.3 Amides and Insect Repellents 626

Preparation of *N,N*-Diethyl-*m*-toluamide 628

Miniscale Procedure 629

Microscale Procedure 631

*Historical Highlights: Evolution of Man-made Analgesics 636***Chapter 21 Multistep Organic Synthesis 639**

21.1 Introduction 639

21.2 Sulfanilamide: Discovery and Synthesis of the First Antibiotic 641

Synthesis of Sulfanilamide 647

A. Preparation of Aniline 647

Miniscale Procedure 648

B. Preparation of Acetanilide 649

Miniscale Procedure 649

C. Preparation of 4-Acetamidobenzenesulfonyl Chloride 650

Miniscale Procedure 650

D. Preparation of 4-Acetamidobenzenesulfonamide 651

Miniscale Procedure 652

E. Preparation of Sulfanilamide 652

Miniscale Procedure 652

21.3 Synthesis of 1-Bromo-3-chloro-5-iodobenzene 662

Synthesis of 1-Bromo-3-chloro-5-iodobenzene 666

A. Preparation of Aniline and Acetanilide 666

B. Preparation of 4-Bromoacetanilide	667
Miniscale Procedure	667
Microscale Procedure	667
C. Preparation of 4-Bromo-2-chloroacetanilide	668
Miniscale Procedure	668
Microscale Procedure	669
D. Preparation of 4-Bromo-2-chloroaniline	669
Miniscale Procedure	669
Microscale Procedure	670
E. Preparation of 4-Bromo-2-chloro-6-iodoaniline	671
Miniscale Procedure	671
Microscale Procedure	672
F. Preparation of 1-Bromo-3-chloro-5-iodobenzene	672
Miniscale Procedure	672
Microscale Procedure	673
21.4 Lidocaine: Synthesis of an Anesthetic Agent	682
Synthesis of Lidocaine	686
A. Preparation of 2,6-Dimethylaniline	686
Miniscale Procedure	686
Microscale Procedure	687
B. Preparation of α -Chloro-2,6-dimethylacetanilide	688
Miniscale Procedure	688
Microscale Procedure	689
C. Preparation of Lidocaine	689
Miniscale Procedure	689
Microscale Procedure	690

Historical Highlights: Discovery of Sulfa Drugs 698

Chapter 22 Polymers 700

22.1 Introduction	700
22.2 Chain-Reaction Polymerization	702
Preparation of Polystyrene	705
Miniscale Procedures	705
Optional Discovery Experiments	706
Stability of Polystyrene toward Organic Solvents	706
Polymers and Water	707
Cross-linking of Polymers	707
22.3 Step-Growth Polymerization	711
Preparation of Nylon-6,10	714
Miniscale Procedure	714
Alternative Procedure	715

Historical Highlights: Discovery of Polyethylene and Nylon 719

Chapter 23 Carbohydrates 721

- 23.1 Introduction 721
- 23.2 Monosaccharides: General Principles 722
- 23.3 Disaccharides: Hydrolysis of Sucrose 723
 - Hydrolysis of Sucrose 725**
 - Miniscale Procedure 725
- 23.4 Carbohydrates: Their Characterization and Identification 727
 - Classification Tests for Carbohydrates 729**
 - Microscale Procedure 729
 - Formation of Osazones 731**
 - Microscale Procedure 731

Historical Highlights: Emil Fischer: Carbohydrate Chemist Extraordinaire 733

Chapter 24 Identifying Organic Compounds 735

- 24.1 Introduction 735
- 24.2 Overview of Organic Analysis 736
- 24.3 Classical Qualitative Analysis Procedure to Identify a Pure Compound 737
- 24.4 Separating Mixtures of Organic Compounds 749
- 24.5 Applying Spectroscopic Methods to Qualitative Organic Analysis 751
- 24.6 Qualitative Classification Tests and Preparation of Derivatives 757
- 24.7 Aldehydes and Ketones 758
- 24.8 Alkenes and Alkynes 767
- 24.9 Alkyl Halides 770
- 24.10 Aromatic Hydrocarbons and Aryl Halides 772
- 24.11 Alcohols 777
- 24.12 Phenols 781
- 24.13 Carboxylic Acids 785
- 24.14 Amines 788
- 24.15 Nitro Compounds 794
- 24.16 Esters 796
- 24.17 Nitriles 799
- 24.18 Amides 801

Chapter 25 The Literature of Organic Chemistry 803

- 25.1 Introduction 803
- 25.2 Classification of the Literature 803
- 25.3 Use of the Literature of Organic Chemistry 816
