PART A SPECTRUM, NOISE, AND MODULATION

1	The Electromagnetic Spectrum	1
1.1	An Introduction to Modern Communications Systems	2
1.2	Electromagnetic Waves and Energy	7
1.3	The Electromagnetic Spectrum and Allocations	11
1.4	Bandwidth and Information Capacity	14
1.5	Simplex, Duplex, and Half-Duplex Systems	18
2	Fourier and Spectrum Analysis	22
2.1	Time and Frequency Domains	22
2.2	The Spectrum Analyzer	25
2.3	Fourier Analysis: Examples	27
2.4	Modulation and the Frequency Spectrum	32
2.5	The Spectra of Digital Signals	33
2.6	Superposition	38
2.7	Power and Energy Spectrum	41
3	Decibels and Noise	44
3.1	Signal Magnitudes and Ranges	44
3.2	Decibel Calculation: Examples	46
3.3	Decibel Reference Values	48
3.4	System Measurements with dB	51
3.5	Decibels and Bandwidth	56
3.6	Noise and Its Effects	58
3.7	Sources and Types of Noise	61
3.8	Noise Measurements	66

4 Amplitude Modulation 73

- 4.1 Need for Modulation 74
- 4.2 Basics of AM 75
- 4.3 Modulation Index and Signal Power 79
- 4.4 AM Circuits 85
- 4.5 Suppressed Carriers and Single Sideband 89
- 4.6 SSB Transmitter Circuits 95
- 4.7 Continuous-Wave AM 99
- 4.8 Transmitter Functions and Testing 100

5 Receivers for AM 108

- 5.1 The Role of the Receiver 108
- 5.2 Receiver Techniques and Stages 110
- 5.3 RF Stage 113
- 5.4 Mixer and Local Oscillator 116
- 5.5 IF Stage 120
- 5.6 AM Demodulation and Audio Stages 126
- 5.7 SSB and CW Demodulation 129
- 5.8 Complete Receivers 130
- 5.9 Amplitude Modulation: Features and Drawbacks 135
- 5.10 AM Receiver Testing 137

6 Frequency and Phase Modulation 141

- 6.1 The Concept of Frequency Modulation 142
- 6.2 FM Spectrum and Bandwidth 143
- 6.3 Transmitters 148
- 6.4 Receiver Functions 156
- 6.5 FM Demodulators 158
- 6.6 The Phase-Locked Loop and Stereo Demodulation 162
- 6.7 Phase Modulation 170
- 6.8 Comparison of AM, FM, and PM 171
- 6.9 FM Receiver Systems 174
- 6.10 FM Testing and Equipment 177

PART B MEDIA, TRANSMISSION LINES, AND WAVE PROPAGATION**7 Wire and Cable Media 182**

- 7.1 Wire and Cable Parameters 182
- 7.2 Balanced and Unbalanced Lines 184
- 7.3 Line Drivers and Receivers 187
- 7.4 Twisted-Pair and Coaxial Cables 193
- 7.5 Time-Domain Reflectometry 196

8 Transmission Lines 201

- 8.1 Impedance and Line Fundamentals 201
- 8.2 Microstrip Lines and Striplines 206
- 8.3 Waveguides 208
- 8.4 Line and Load Matching 215
- 8.5 The Smith Chart 224
- 8.6 Test Equipment 227

9 Propagation and Antennas 233

- 9.1 Propagation and the Function of Antennas 234
- 9.2 Propagation Modes 235
- 9.3 Antenna Characterization 242
- 9.4 Antenna Fundamentals 249
- 9.5 Elementary Antennas 253
- 9.6 Advanced Multiple-Element Antennas 259
- 9.7 Advanced Single-Element Antennas 266

PART C DIGITAL SYSTEMS**10 Digital Information 276**

- 10.1 Digital Information in Communications 277
- 10.2 Digital Specifications 283
- 10.3 Sampling, Bandwidth, and Bit Rates 289
- 10.4 Digital Testing 292

11 Digital Communication Fundamentals 299

- 11.1 Analog-to-Digital and Digital-to-Analog Converters 300
- 11.2 Pulse Code Modulation 302
- 11.3 Synchronization 310
- 11.4 Delta Modulation 314
- 11.5 Troubleshooting 317

12 Digital Communication Systems 321

- 12.1 Complexity of Digital Communications 322
- 12.2 Coding 325
- 12.3 Format 328
- 12.4 Physical Interface and Throughput 331
- 12.5 Protocol and State Diagrams 338
- 12.6 Asynchronous and Synchronous Systems and Effective Throughput 342
- 12.7 Error Detection and Correction 348

13 Digital Modulation and Testing 362

- 13.1 Basic Modulation and Demodulation 363
- 13.2 Quadrature Amplitude Modulation 369
- 13.3 Loopbacks, Error Rates, and Eye Patterns 373
- 13.4 Random Bit Generation and Data Encryption 380

PART D COMMUNICATIONS SYSTEMS AND APPLICATIONS**14 TV/Video and Facsimile 388**

- 14.1 Imaging Basics 389
- 14.2 The TV Signal 393
- 14.3 Color TV 397
- 14.4 TV Receivers 401
- 14.5 Facsimile 407
- 14.6 MPEG Encoding, Digital TV, and Broadcast Direct Satellite TV 412

15 Frequency Synthesizers and Direct Conversion 421

- 15.1 Direct and Indirect Synthesis 422
- 15.2 Basic Indirect Synthesis 425
- 15.3 Extending Synthesizers 431
- 15.4 Synthesizers and Microprocessor Systems 435
- 15.5 IF-to-Baseband Conversion, Undersampling, and Wideband Digital Receivers 441

16 The Telephone System 446

- 16.1 Overview of the System 447
- 16.2 The Telephone Instrument and the Local Loop 450
- 16.3 The Central Office and Loop Supervision 459
- 16.4 The Central Office and Switching 462
- 16.5 Electronic Switching Systems 470
- 16.6 Echoes and Echo Cancellation 475
- 16.7 Digital Signals and Switching 479

17 The RS-232 Interface Standard, Modems, and High-Speed POTS Links 484

- 17.1 Role of the Interface Standard 485
- 17.2 RS-232 Operation 487
- 17.3 RS-232 ICs 495
- 17.4 RS-232: Examples and Troubleshooting 498
- 17.5 Modem Functions 504
- 17.6 Standard Modems for POTS Lines 512
- 17.7 Other “RS” Communications Standards 517
- 17.8 High-Speed POTS Links Using xDSL 520

18 Local and Wide Area Networks; Special-Purpose Links 526

- 18.1 Network Applications 527
- 18.2 Topologies 530
- 18.3 Protocols and Access 533
- 18.4 Network Examples 539
- 18.5 Wide Area Networks and Packet Switching 550
- 18.6 Advanced Networks: ISDN, SONET, FDDI, and ATM 556
- 18.7 The Internet and the World Wide Web 561
- 18.8 Special Networks: FireWire, Universal Serial Bus, IrDA, and Home Automation 568
- 18.9 Spread-Spectrum Systems 576

19 Satellite Communication, Navigation, and the Global Positioning System 587

- 19.1 Communications and Orbits 588
- 19.2 Satellite Design 593
- 19.3 Ground Stations 600
- 19.4 LORAN Navigation 604
- 19.5 Satellite Navigation 607

20 Cellular Telephone and Advanced Wireless Systems 616

- 20.1 The Cellular Concept 617
- 20.2 Cellular System Implementation 622
- 20.3 Cellular System Protocol and Testing 636
- 20.4 Advanced and Next-Generation Cellular Systems 639
- 20.5 Basic and Advanced Paging Systems 647

21 Radar Systems 653

- 21.1 Radar Concepts and Display 654
- 21.2 Pulse Shapes 660
- 21.3 Radar System Circuitry and Components 668
- 21.4 Advanced Radar Systems 672

PART E BROADBAND SYSTEMS**22 Multiplexing 678**

- 22.1 Introduction to Multiplexing 678
- 22.2 Space-Division Multiplexing 680
- 22.3 Frequency-Division Multiplexing 682
- 22.4 Time-Division Multiplexing 687
- 22.5 Multiple-Stage Multiplexing 696

23 Microwave Equipment and Devices 700

- 23.1 Test Instruments and Methods 701
- 23.2 Vacuum-Tube Devices 710
- 23.3 Semiconductor Devices 721
- 23.4 Surface Acoustic Waves 726

24 Fiber Optics 730

- 24.1 Fiber Optic System Characteristics 731
- 24.2 The Optical Fiber 733
- 24.3 Sources and Detectors 740
- 24.4 Complete Systems and Networks; Optical Switching Multiplexers, and Amplifiers 747
- 24.5 Fiber Optic Testing 760

ANSWERS TO SELECTED PROBLEMS 771**APPENDICES**

- A Electromagnetic Spectrum 791
- B dB Table 794
- C ASCII Code Chart 795
- D The Internet Transport Protocol (TCP/IP) 798
- E Useful Web-based Resources and References 803

INDEX 805
