

Contents

Preface	vii
---------------	-----

Chapter 1. Introduction

1. What Is Linear Programming?	1
2. Examples of Linear Programs	12
3. Graphical Method	25

Chapter 2. Background

4. Logic	34
5. Matrices	43
6. Systems of Linear Equations	52

Chapter 3. Tableaux and Pivoting

7. Standard and Canonical Forms for Linear Programs	67
8. Pivoting Tableaux	76
9. Standard Row Tableaux	89

Chapter 4. Simplex Method

10. Simplex Method, Phase 2	100
11. Simplex Method, Phase 1	112
12. Geometric Interpretation	121

Chapter 5. Duality

13. Dual Problems	133
14. Sensitivity Analysis and Parametric Programming	143
15. More on Duality	156

Chapter 6. Transportation Problems

16. Phase 1	166
17. Phase 2	180
18. Job Assignment Problem	192

Chapter 7. Matrix Games

19. What are Matrix Games?	199
20. Matrix Games and Linear Programming	210
21. Other Methods	220

Chapter 8. Linear Approximation

22. What is Linear Approximation?	229
23. Linear Approximation and Linear Programming	241
24. More Examples	251

Appendix. Guide to Mathematical Programming

A1. Mathematical Programming	257
A2. Univariate Programming	261
A3. Convex and Quadratic Programming	270
A4. Multivariate Programming	273
A5. Interior Methods	280
A6. Perturbation	286
A7. Goal Programming	287
A8. Linear Programming in Small Dimension	289
A9. Integer Programming	292
A10. Sorting, Order Statistics, and Saddle Points	295
A11. Other Topics and Recent Developments	298
Bibliography	301
Answers to Selected Exercises	305
Index	318
