

WEB OF SCIENCE

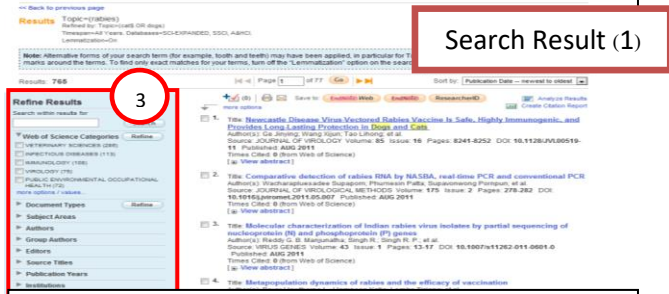

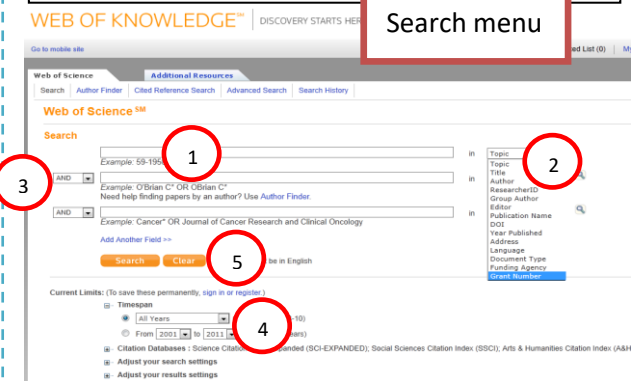

WEB of Science is a citation and abstract database which provide interdisciplinary field such as science, social science, and humanities from journals more than 10,000 journals since 2001

Search resources in Web of Science

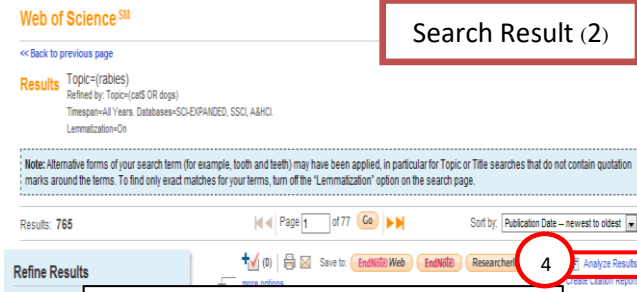

1. Search is a searching method that users can search via topic, author, publication year, and address (of author office)
2. Author Finder is a searching method that users can search for all works of the author
3. Cited Reference is a searching method that users can search citation information from articles or books.

1. Show result amount
2. Search within result in "Search within results for" to limit

3. Result from "search result" can be refined and limited by "Refine results". Users can limit by categories such as Web of Science Categories, Document Types, Subject Areas, Authors, Group Authors, Editors, Source Titles, Publication Years, Institutions, Funding Agencies, Languages, and Countries/Territories etc

1. Type keyword
2. Limit search result such as Topic, Title, Author, Address etc.
3. Select AND OR NOT to limit search result
4. Limit period of publication
5. Click Search

Analyze Results use to analyze results which will generate results into group such as subject, source title.

Web of Science™

Cited Reference Search (Find the articles that cite a person's work)

Step 1: Enter information about the cited work. Fields are combined with the Boolean AND operator.

* Note: Entering the volume, issue, or page in combination with other fields may reduce the number of cited reference variants found.

Example: O'Brian C* OR Obrian C*

Example: J Comp* Appl* Math* (j)

Example: 1943 or 1943-1945

Add Another Field >>

Search Clear

- Cited Author: use author's surname to search
- Cited Work: name of cited works such as name of book or journal
- Cited Year(s): year of publication of cited work
- Click Search
